

#### The Vodafone Vision

## Vodafone recognised by analysts as clear IoT

# glearther.

Machina Research

Vodafone positioned as a leader for the 3<sup>nd</sup> year in Gartner Magic Quadrant for Managed M2M
Services in 2016

Machina Research names
Vodafone 'the consistent
global leader' in IoT
services for the 5th
consecutive year in 2016

Rated best worldwide

CSP in the M2M

Communication Service

Provider Scorecard – a

record 4th time in 2015

### Vodafone IoT in numbers

50m
IoT connections

84m MB of data per month

1300+
oT professionals

...with a wide range of connectivity solutions

### IoT goes mainstream

#### Vodafone end-to-end IoT solutions

Hardware, asset & device

Managed platform & connectivity

loT application

Through hardware expertise, managed connectivity and software applications, Vodafone offers true end-to-end, single point of contact solutions for IoT

#### **IoT Fleet Control**

- Complete device portfolio
- Real time vehicle data from sensors,
   CANbus / OBD monitoring
- Enterprise dashboard and vehicle grid
- Fast and powerful mapping (location, route playback, POI, geofence, geospatial queries)
- Detailed & scheduled reports, Insightful alerts
- Mobile app

App Ston

#### **IoT Cooler Control**

- Cooler monitoring
  - Temperature

Door events

Humidity

Stock levels

Power

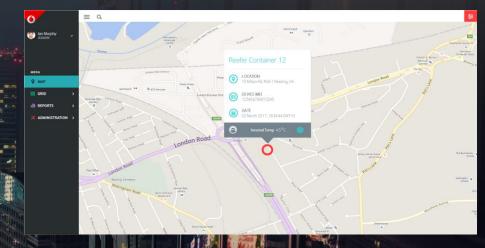

- Controller connectivity
- Motor efficiency
- Location tracking
- Focus on retailer quality compliance assistance
  - Detailed reporting e.g. specialized HACCP reportsCertified device as Class 1 Temperature logger
  - On event Alerts & user notifications
- Mobile app

### **Mobile Asset Tracking**

- Asset Tracking
  - Mobile Asset tracking and monitoring of transport conditions
  - Location based on multiple Cell ID and GPS, battery level and sensor data (temperature, motion, light, tamper).
- Stolen Vehicle Recovery (SVR)
  - Device sends vehicle location based on Cell
  - ID, temperature and battery level
  - GPS Activated on demand over GPRS or SMS.

# IoT Energy Control

- Smart Meter complete metering solutions
  - Solar energy production for homes & solar parks.
  - **Natural Gas consumption for homes**
  - **Energy consumption for corporate customers**
  - Unique functional characteristics
    - **Dedicated User Portals**
    - Real time production/consumption information
    - **Detailed reports**
    - **Additional sensors**
    - Alerts via SMS & email

### **NB-IoT:** The future is closer than you think

Coverage & signal penetration

Great power efficiency

Massive scale deployments

Low cost hardware

Low bandwidth

A standards-based (non proprietary) technology, leveraging the existing 4G network & using licensed spectrum that will—ultimately increase IoT adoption

## Narrowband IoT opens up new propositions for
