Presence Analytics

- Analytics (Google-like), only for the real world
- Makes use of the MAC Identities
- Statistical information extracted from 1.000's of subscribers; no individual profiling takes place
- No compromise in privacy & consent by users is not required

Population Density

- Animated Heatmap presenting geo-distribution of users
- Captures the movement of population during the day

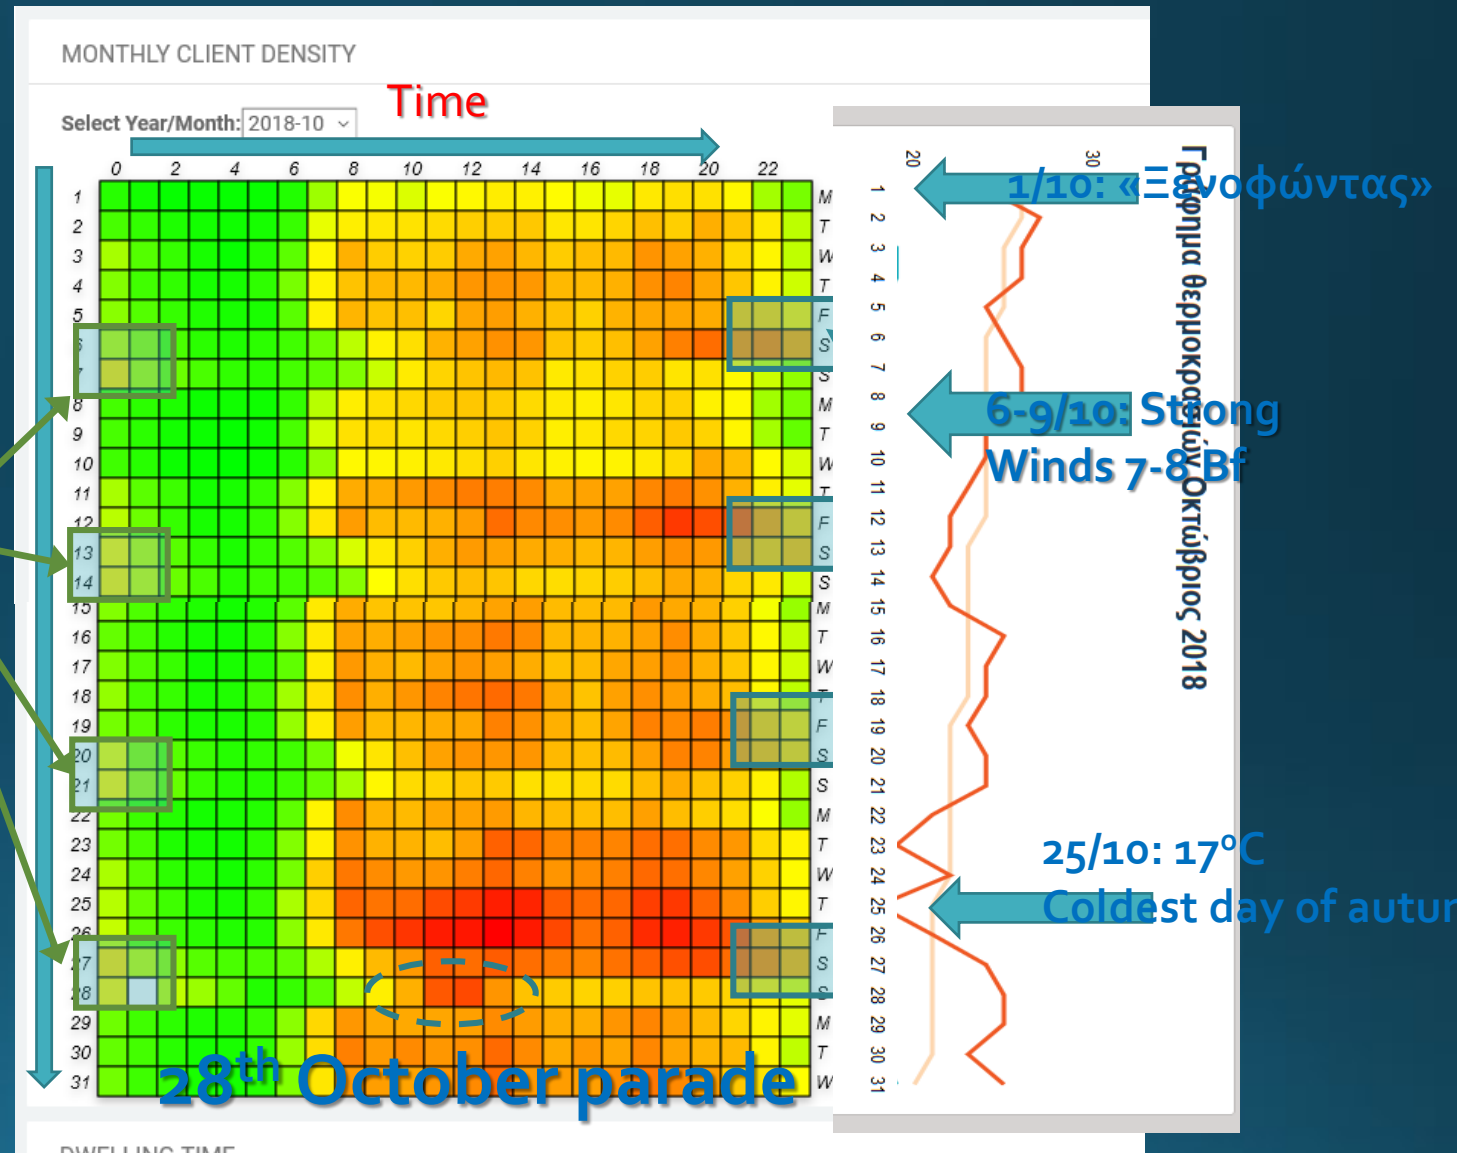

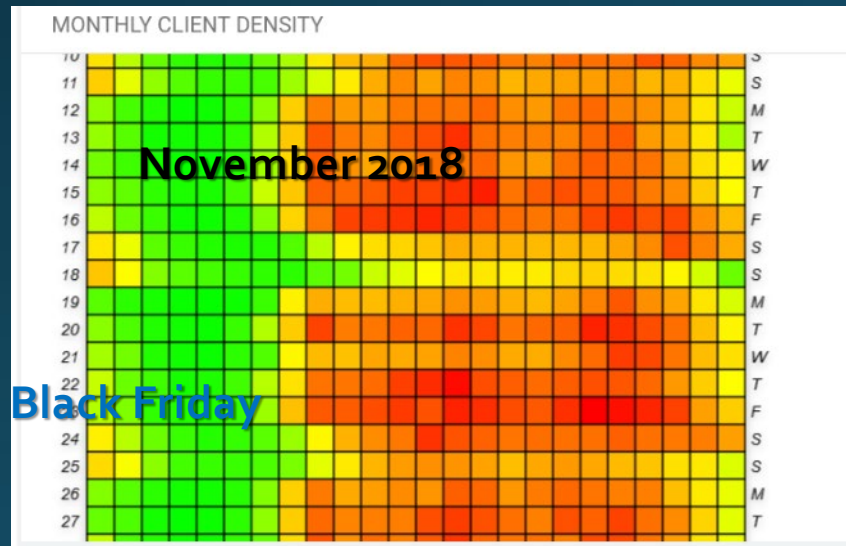

Visitors' Patterns Insights

- Useful trending tool
- And conclusions drawing

Date
(October)

Weekend ... Entertainment
until late for some people

Returning Visitors

- Unique visitors
- Returning visitors
 - Daily
 - Weekly
 - Monthly basis
- Insight into commercial value, identify hotspots

Marketing Insights

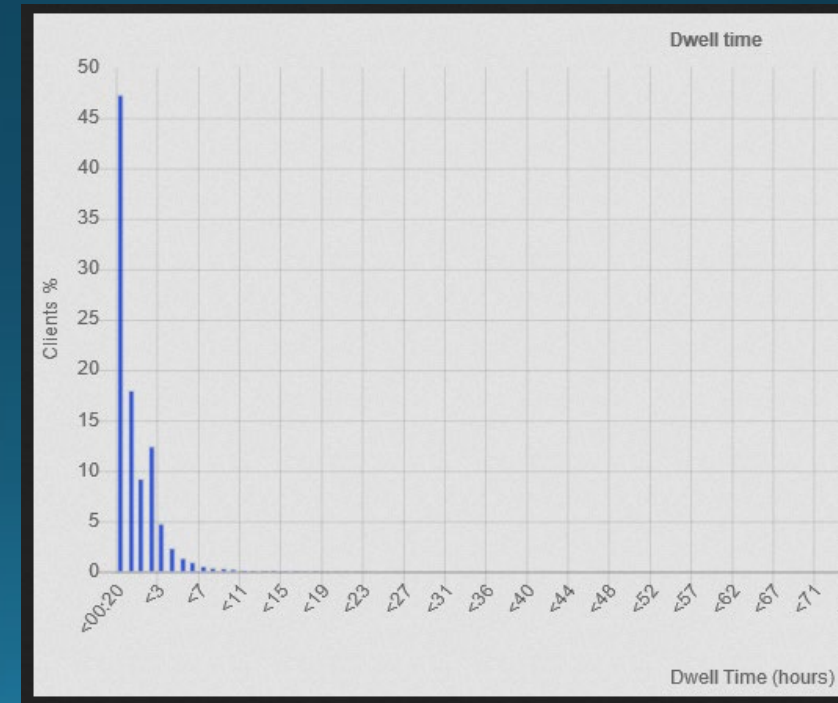

Identifying “hotspots”

- Which areas are most popular

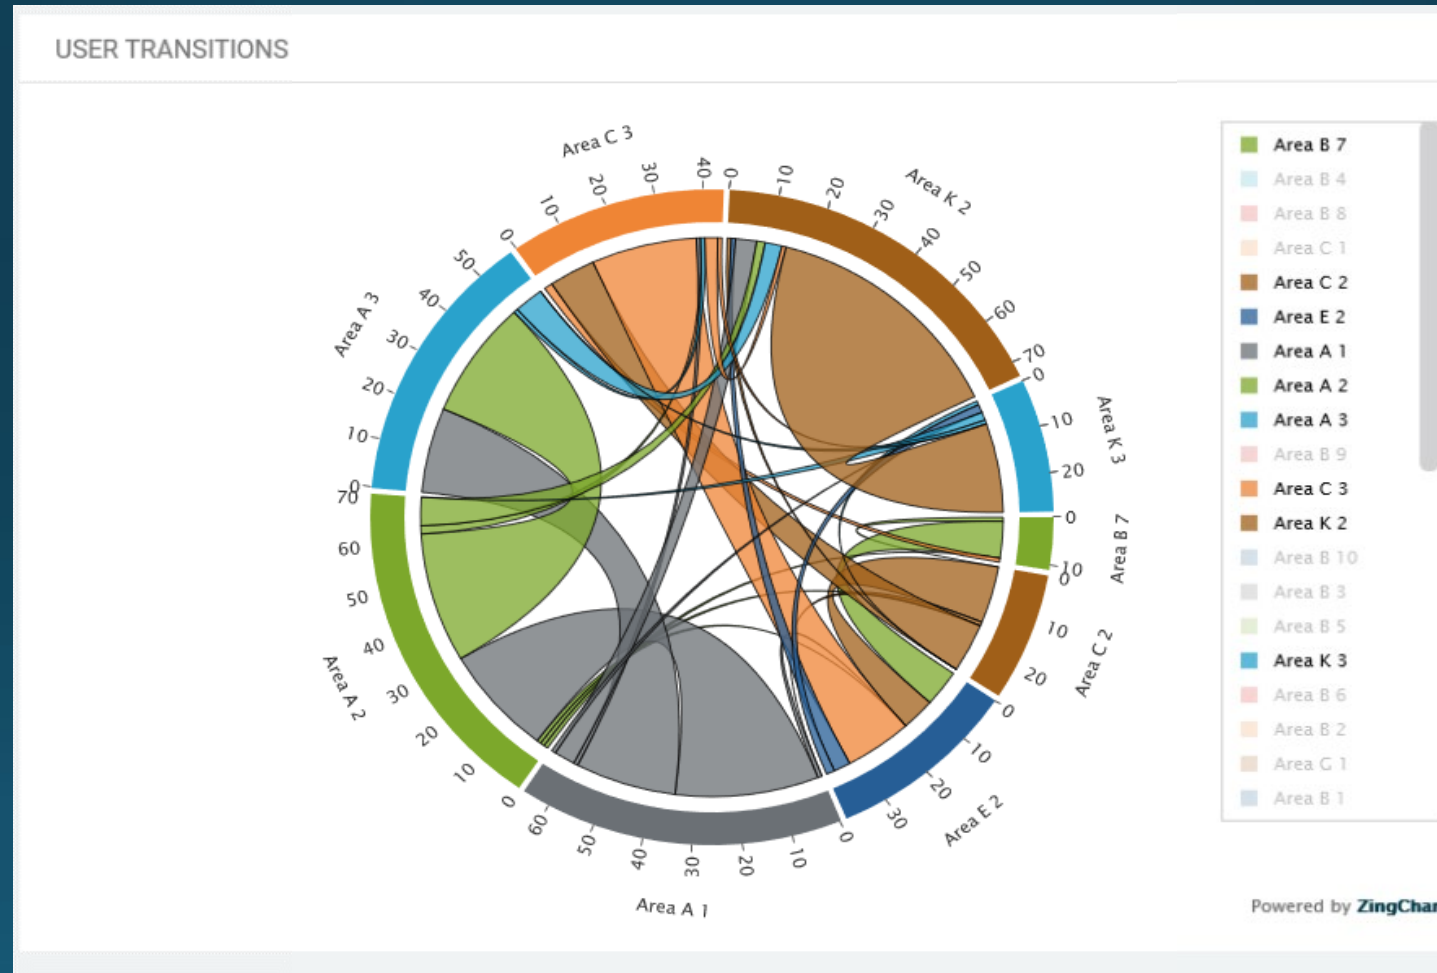

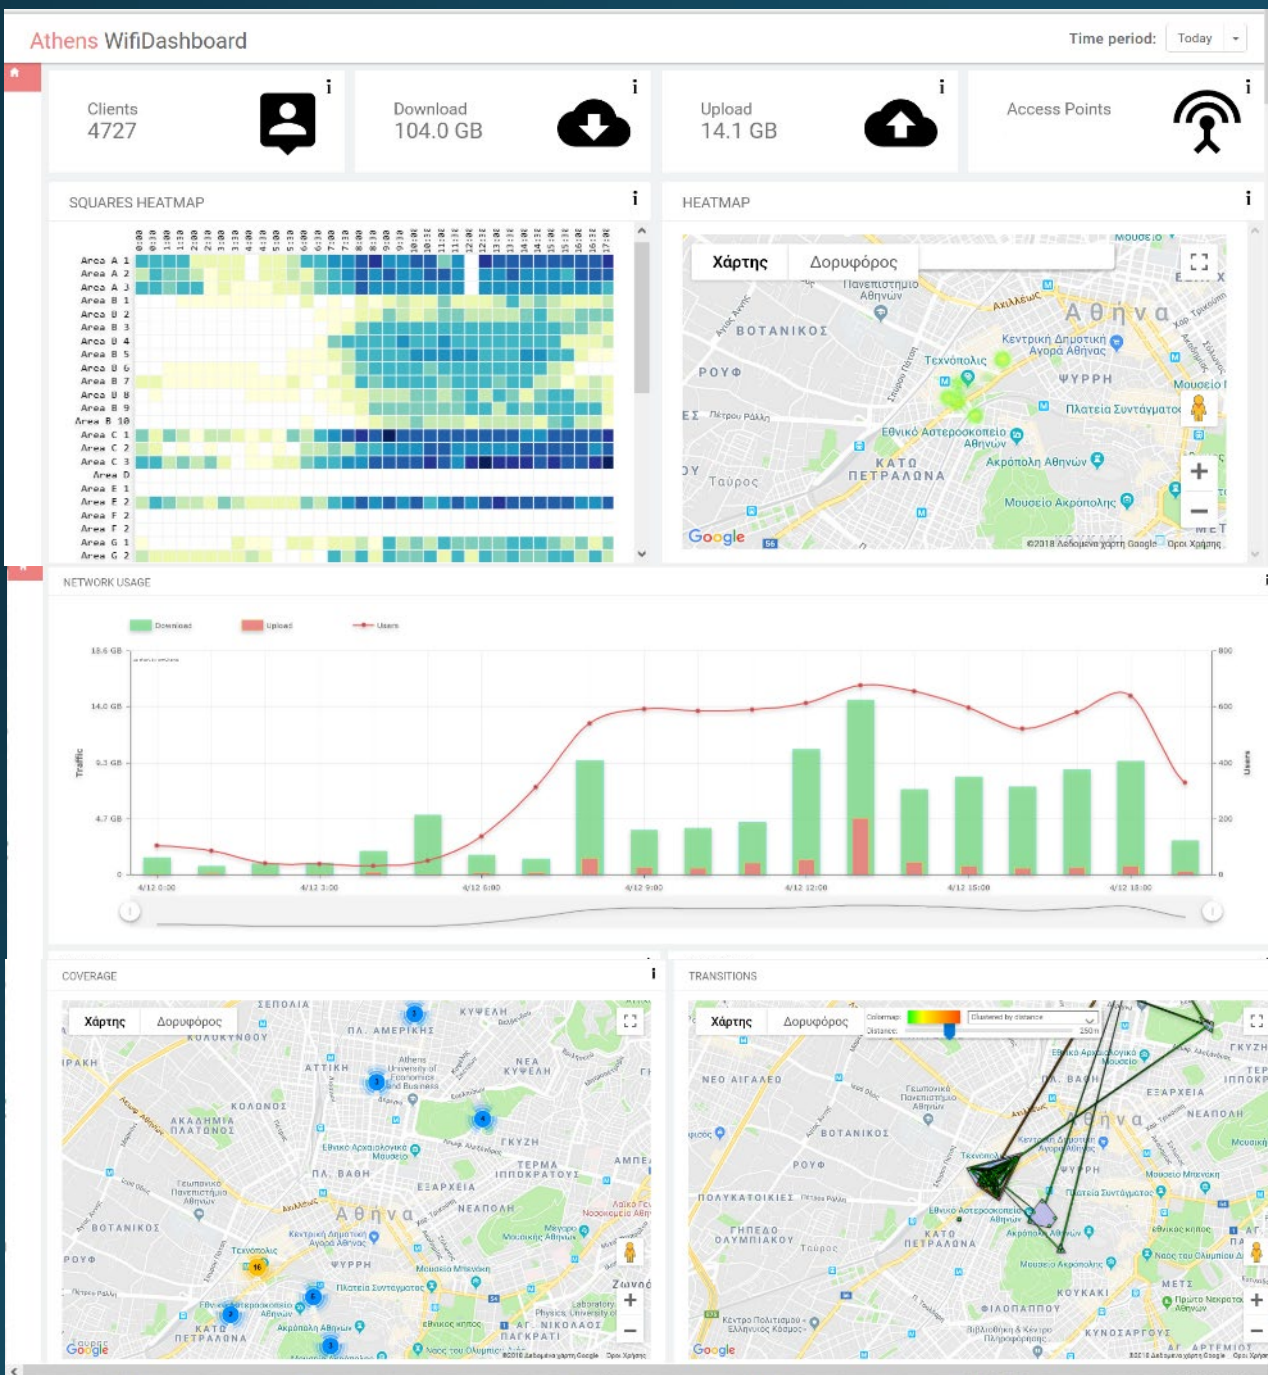

Dwell Time

- Per area of interest

Identifying City Dynamics

Composing a City Dashboard

- Fully anonymized population density trends
- Actionable Insight
- Rule-based Decision Support
- Identification of incidents / abnormal events

Application in Smart City Security

Early Warning Zones

- Knowing that someone should not be in the vicinity of a Critical Infrastructure
- Requires whitelisting the personnel
- Issues alerts when potential intrusion detected
- Establishing Early Warning Zones
- Fusing with camera data
- Privacy issues are not inhibiting in the case of safety/security

Application for Safe Evacuation (Stadia)

Initial conditions (how many spectators are in their seats, in the corridors)

Assessment of the progress of evacuation, e.g.

- 25% still in their seats
- 50% are in the exit corridor
 - of which 20% are stationary in the last 5 mins
- 25% exited already

Privacy - GDPR

Solution respects the citizens' private sphere:

- MAC address are personal data
- Art. 22 GDPR "Automated individual decision-making, including profiling" prohibits use for individual profiling

However

- MAC data are (pseudo) - anonymized
- Statistical processing, no individual recommendations made (no "profiling")

Concluding...

Valuable tool for city planning, hotspot identification:
URBAN ANALYTICS

Builds on existing infrastructure, works with standards SNMP protocol

Doesn't require the active user involvement

- No need to download application, sign consent forms
- ...still respects the users' privacy
